

VEOS system well perceived at the NASS 2023 conference in the United States

Sales growth in France

Spineway Group, specialists in innovative implants for the treatment of severe spinal pathologies, is pleased to announce that its VEOS posterior spinal fixation system received an excellent response from the spine implant industry at the North American Spine Society (NASS) Congress in Los Angeles last October¹.

During the event, the Group received numerous expressions of interest in its VEOS fixation system, which has obtained 510(k) clearance from the Food and Drug Administration (FDA), and established contacts with potential American partners for its distribution in the USA. This innovative platform offers spine surgeons a unique modularity, since the rational organization of the implant and instrument kits enables them to perform many different types of procedure with a single system, whether in open or minimally invasive surgery (MIS).

As a reminder, the VEOS range is one of a number of Distimp² products that now account for a significant proportion of the Group's sales in France. In the first nine months of 2023, Distimp sales in France rose by 45% compared with 2022, driven mainly by the success of the VEOS range with a large number of French healthcare establishments, including several University Hospitals.

This trend should continue with sales of the VEOS range starting up in Spain before the end of 2023.

Thanks to of these initial positive developments, Spineway will be pursuing its development plans, confirming its aim of becoming an innovative player in France and internationally, leader in less invasive spine treatments.
